

# JHS-183 AIS

JRC

– the JHS-183 sets the next step for best choice for long range reception

- 4.5-inch high brightness display**
- Dual color LED backlight**
- Displaying up to 200 AIS targets**
- Proven transponder design**
- Advanced interfacing possible**

# JHS-183

## – features

### Features

The JHS-183 is an important piece of navigation equipment for collision avoidance and maneuvering, featuring an all new display and a transponder designed for long range reception.

### Dual color LED backlight New

The JHS-183 incorporates many display modes readily available on a highly visible 4.5-inch LCD display. Besides the display being fully dimmable and backlit keys, it features dual LED backlight (white and orange), making it easy to operate in various light settings on the bridge.

### No flush mount kit

With JRC's new design approach, a flush mount kit is not required and screws are nicely concealed behind the front cover.

### Guard zone

This function allows the user to set a guard zone, providing a visual and audible alert for any vessel entering that area.

### Own group vessels

The JHS-183 incorporates a function that recognizes own group vessels. When presetting a vessel's identification, it can easily be shown on the display.

### AIS-SART

The JHS-183 supports the reception of AIS-SART signals which are automatically sorted to the top of the screen.

### Self diagnosis

The built-in automatic self-diagnosis function allows easy maintenance and contributes to an ever higher system reliability.

# JHS-183

## – operation

### Uniform operation

In keeping with the company's philosophy of an easy to use Man Machine Interface, the new generation displays have allowed JRC's engineers to develop an exciting new software approach for uniform operation.

The JHS-183 is able to display up to 200 AIS targets and the excellent on-screen menus will greatly shorten most users' learning period.

### About AIS

The JHS-183 AIS is a ship borne system capable of regularly broadcasting own ship's unique information and continually receiving and displaying information broadcast from other vessels. The AIS can "see around corners", allowing avoidance of dangers before visual contact has been established. All ship's information including static and voyage related data such as the ship's name and cargo, as well as its dynamic navigational information, i.e., position, course, and speed can be transmitted and received.

### Integration with navigation equipment

The JHS-183 is an important piece of navigation equipment onboard for collision avoidance and maneuvering. The information broadcast from other ships displayed on the AIS, together with the geographical information shown on the radar or ECDIS provides highly important data for strategic decisions and for prompt contact with other ships.

### Remote Maintenance System (RMS)

JRC has the ability to cost-effectively monitor performance and functionality of the JHS-183 while at sea, significantly reducing downtime and maintenance costs. [jrceurope.com/rms](http://jrceurope.com/rms)

## – flexibility

### New transponder New

JRC's advantage of long range reception has been the basis for this new model. The outside of the transponder is the same as its predecessor, but the inner parts have been completely updated to the latest technologies, such as digital signal processing, increased circuit integration and optimized transmission power.

### Interfacing

Interfacing is made easy and cost-effective. Connect your radar or ECDIS, GPS and gyro to the display and you're all set.

With the (optional) all new connection box you'll receive all the interfacing you need for advanced networking, such as DGPS, alarm, long range, and more.

A dedicated pilot plug port and LAN interfacing for maintenance or connecting to the ship's network is also readily available.

### Installation

The JHS-183 consists of just two components, display and transponder. The components are light and compact with only one coax cable between the display and transponder required. This allows for a straightforward installation approach, significantly reducing the installation time.

### Long LCD life

The LCD has a life span of 50,000 hours guaranteeing many years of continuous operation - regardless of the LED backlit color selected.

#### What's standard?

- AIS Controller
- AIS Transponder
- Control cable
- Spare parts
- Instruction manual

#### What's optional?

- Connection box NQE-5183
- Pilot plug box NQE-3150 (Wall mount type)
- Control cable for NCM-983 CFQ-9183A/D/F (2/10/20m)
- Data cable for NQE-5183 CFQ-9193A/D/F (Wall mount cable 3/10/20m)
- Pilot plug cable CFQ-9173A (30cm)
- Pilot plug cable CFQ-6961 (20m)
- AC/DC Power supply unit NBD-577C (100/220V Manual Change)
- AC power supply unit for Pilot PC NBG-380 (120Vac output)
- Console mounting kit for NQE-3150 MPBX40498 (Color: 7.5BG7/2)  
MPBX45388 (Color: N4.0)
- L-type adapter CFQ-9184

## – dimensions

### AIS Transponder New

**NTE-183** Mass 2.6kg

### AIS Controller New

**NCM-983** Mass 2.1 kg

### Connection box (option) New

**NQE-5183** Mass 2.5kg

### AC/DC Power supply unit (option)

**NBD-577C** Mass 5.2kg

## – specifications

Model	JHS-183
Name	Automatic Identification System
IMO type approved	○
Frequency	156.025-162.025 MHz, default channels 161.975 MHz, 162.025 MHz, DSC (receive only): 156.525 MHz
Frequency accuracy	Within $\pm 3 \times 10^{-6}$
Channel spacing	25 kHz
Type of emission	AIS: G1D (F1D)
Type of modulation	AIS: GMSK
Power	19-35V DC (optional AC/DC power supply unit 100-220V AC)
Consumption	Up to 3.0A (transmitting), up to 1.0A (receiving)
Output power	12.5W/1W
Display <span>New</span>	4.5-inch FSTN LCD (128 by 64 pixels)
Keyboard	12 (backlit) keys
Dimmer	4 levels
Interfacing (standard)	IEC61162-1/2 input: 2 ports (GPS, gyro) IEC61162-2 in/output: 1 port (radar or ecdis)
Interfacing (with connection box)	IEC61162-1/2 input: 3 ports (GPS, gyro, speed log) IEC61162-1/ITU-R M, 823-2: 1 port (DGPS) IEC61162-2 in/output: 3 ports (radar, ecdis, long range) IEC61993-2 alarm output: 1 port
IEC61162-1 input	GNS, GLL, DTM, GBS, VBW, RMC, HDT, ROT, GGA, VTG
IEC61162-2 input	ABM, ACA, ACK, AIR, BBM, LRI, LRF, VSD, SSD, EPV, HBT, VDS, AIQ
IEC61162-2 output	ABK, ACA, ALR, DSC, DSR, LRF, LR1, LR2, LR3, TXT, VDO, VDM, TRL, VER, NAK
LAN <span>New</span>	IEC 61162-450: 1 port (for maintenance and ship's network)
Pilot plug	IEC61162-2 in/output: 1 port
Pilot plug input	ABM, ACA, ACK, AIR, BBM, EPV, SPW, HBT, SSD, VSD, AIQ
Pilot plug output	ABK, ACA, ACS, ALR, TRL, TXT, SSD, VSD, VDM, VDO, VER, NAK, DSC, DSR
Transponder connection	Single coax cable (up to 50 m) from display to transponder
Ambient conditions	Operating temperature: -25 to 55°C (AIS Transponder) -15 to 55°C (AIS Controller, Connection box) IP protection rate: IP56 (AIS Transponder), IP55 (AIS Controller) Relative humidity: 0 to 95% non-condensing
