

The wait is over. VSAT within reach.

Introducing TracPhone V30

VSAT at sea has never been easier or more affordable! Delight in the freedom of life on the water while TracPhone V30 keeps you connected when you want

to be. Stream HD content, chat via WhatsApp™, connect with the office, get weather information, browse the Internet, and check emails, whether you are at the dock, along the coast, or offshore.

This 37 cm (14.5") D digital VSAT system delivers high-speed connectivity, outstanding reception with improved signal efficiency, and high-performance tracking and stabilization designed for the fastest boats and roughest seas. Plus, its single cable, DC-powered design makes TracPhone V30 easy and fast to install. Bring the best onboard from KVH, the No.1 maritime VSAT communications provider.*

Live, work, and relax onboard...just like home!

The all-new innovative design of TracPhone V30 makes VSAT accessible and affordable while delivering blazing fast speeds, easy installation, and next-generation technology. Plus, its flexible and affordable airtime plans offer a solution for every boater's needs. The TracPhone V30 provides:

- A commercial-grade global VSAT antenna with single cable, simple installation, rotary joint for unlimited rotation, and DC power
- An ideal solution for smaller boats or an ultra-fast VSAT backup for superyachts
- ▶ Data speeds as fast as 6/2 Mbps (down/up) via the layered mini-VSAT Broadbandsm HTS network
- Choice of metered or unlimited use global airtime plans
 - Metered plans deliver the fastest data speeds at the most affordable rates
 - Unlimited use plans offer data with no overage charges. If the plan's monthly high-speed data allotment is consumed, the system automatically shifts to the plan's shaped data rate with unlimited usage and resets each month.
 - Month-to-month contract with flexibility to switch plans or suspend service

The most advanced maritime network available

The TracPhone V30, together with KVH's mini-VSAT Broadband HTS network, offers outstanding speed and coverage using next-generation high-throughput satellites (HTS) from Intelsat and additional capacity from SKY Perfect JSAT, all of which are integrated within the Intelsat Flex Maritime platform.

KVH's HTS network with 276 million sq. km (106+ million sq. mi) of coverage

A high-speed global network that delivers speeds as fast as 6/2 Mbps (down/up) to the TracPhone V30

Crystal-clear, prioritized VoIP service for exceptional call quality; system also supports Wi-Fi Calling via compatible cell phones**

Greater resilience to weather and rain fade than Ka-band services, so you are connected when you need it most

KVH Multi-level Cybersecurity Program offers an advanced network-level firewall, automated threat management, secure boot, encrypted drives, and more

Automatic, fast switching among the network's redundant beams, ensuring seamless and reliable communications wherever you travel

KVH Manager – creating confidence through control

The KVH Manager suite of tools gives you valuable insight and control over data usage to manage your operational and personal use.

- Tune your onboard network with the built-in data shaping and user-managed application category controls to support your unique needs and limit unintended data consumption
- Monitor your usage in real time
- Set up and receive usage alerts to stay aware of your monthly data consumption

Small, fast, and smart in every way

The VSAT-Hub is the TracPhone V30's ultra-compact belowdecks unit that eliminates the need for rack mounting. Coupled with the compact digital

antenna, this streamlined, commercial-grade system delivers a power supply for DC power,[†] a web-based, user-friendly interface, state-of-the-art HTS modem, four Ethernet ports for LAN/VLAN support, NMEA 0183 and 2000 inputs, built-in Wi-Fi, data routing and firewall security, and a VoIP adapter to support the VoIP phone line.

Bring the best onboard with KVH

The results speak for themselves. In any harbor, anywhere around the world, you'll see KVH's distinctive white antennas with gray baseplates. With more than 200,000 in-motion antennas fielded worldwide, KVH has supplied more satellite communications and TV antenna systems for mobile applications than any other manufacturer. When you choose KVH, you choose the best!

Stay connected with KVH's global support

KVH OneCare™

Our global support program protects your VSAT investment and helps you minimize your costs. KVH OneCare delivers a comprehensive service offering, including:

- Application Engineering, Solution Deployment, and Operating Support for the life of your product
- > 2-year parts and labor warranty along with the option for extended warranty coverage for an additional 3 years
- Support in 4,000 ports worldwide

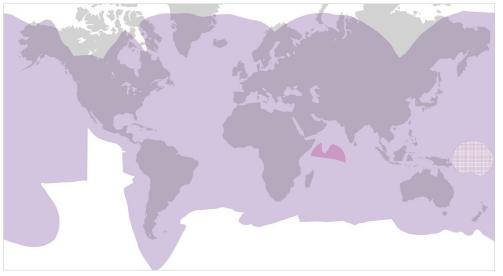

IoT Proactive Monitoring

The TracPhone V30 system's integrated IoT functionality reports daily on 150⁺ performance and health parameters to help optimize your system's performance for a premium connectivity experience.

TracPhone V30 Coverage

The TracPhone V30 offers global connections with blazing speeds using the advanced next-generation satellites of the layered mini-VSAT Broadband HTS network.

Global Service*

Ku-band Coverage Anticipated 2021 Coverage

TracPhone V30 has a 2-axis stabilized antenna pedestal design that does not provide coverage in areas where the satellite is directly overhead.

*The map depicts KVH's expectations for the mini-VSAT Broadband HTS Network's coverage for the TracPhone V30. For the most up-to-date coverage maps, visit kvh.com/v30map.

Actual coverage and availability may vary. Data rates may also vary in different regions. KVH provides no guarantees of satellite coverage or availability.
